The site is written in German. I can't log in using Google's Web page translator so it is a matter of translating words and phrases. It won't translate button names. You can drag/drop filenames but can't copy/paste images.

1. After logging in, click the first green button, Bildupload.

2. Drag/drop the filename into the space provided.
3. Click the second green button, Bildverwaltung. Thumbnails of your images will display.
4. Select the image and click the green Code button.
5. The last item in the list is the direct link you need.
